Third Annual Golf Tournament

John Knox of Kindersley Wins
First Flight. D. M. Irwin Wins
Qualifying Round.

The start of the third annual golf tournament was delayed owing to rain, which commenced to fall about 7 a.m. and continued till about 9:30. Shortly after 9:30, breaks in the clouds appeared and the rain stopped, so the committee in charge, after considering postponement, decided to go ahead, and play was commenced about 11 a.m. For the first round the greens proved heavy, being very wet on the oiled surface, but as play continued the greens improved, and conditions generally were very favorable for good play.

Owing to the early morning rain fall, the attendance of visitors was light, but those present did very well, all three prizes in the first event, first in the qualifying round and first in the third flight, going out of town.

Prizes were won as follows:

Qualifying Round: Tie between William Chisholm (Oyen) and D. M. Irwin (Kindersley). On play-off, D. M. Irwin won at second hole.

First Flight: John Knox (Kindersley), first; Garry Powers and D. M. Irwin played off a tie; D. M. Irwin (Kindersley), second; Garry Powers (Hanna), third.

Second Flight: E. MacArthur played off a tie with Art Wade, and M. G. Whitlock played off a tie with Charles Stewart. E. MacArthur, first; Art Wade, second; M. G. Whitlock, third.

Third Flight: William Bredin, (Coreal), first; E. Charbonneau, (Monitor), second; C. L. Dunford, third.

Ladies Flight: Mrs. M. G. Whitlock, first; Mrs. Powers, (Hanna), second; Mrs. H. C. Swartzlander, third.

A picture show and dance held at night, were well attended and proved very enjoyable.

Eucharistic Congress Chicago, June, 1926

The Greatest Event in the History of the Catholic Church in America

C.N. Rys. To Operate Special Trains From Western Canada

Of unusual importance to Roman Catholics is the 28th International Eucharistic Congress in Chicago, Ill., June 20th to 24th next.

The Church dignitaries are duly appreciative of the efforts made by the Canadian National Railways, who have arranged to operate special trains to and from the Congress, and have also made reservations for several hundred people in good hotels at a reasonable expense, and ask their people to make application promptly for the necessary sleeping car and hot of accommodation. The Church authorities were consulted prior to arranging the train service so that the proper departure time from the various centres would be ensured.

Those who desire to use the regular service have the privilege of travelling on the through train which is operated during the summer season from Western Canada to Chicago.

Any agent of the Canadian National Railways will be pleased to give you further particulars and complete all arrangements.

GOVERNMENT HAS A MAJORITY ON HOUSE DIVISION

OWLA—A division on a motion for appointment of a special committee of the house to consider railway estimates gave the government a majority. The division was: For, 107; against, 92.

As in the budget divisions, Progressives, Independent and Labor members voted with the government. Two Conservative members contributed to the government majority. R. S. White (Mount Royal) and W. F. McLean (South York). Premier King did not vote. Right Hon. Arthur Meighen was absent from the division through illness. Premier King announced subsequently that, although he had not been pained for today's division, he had refrained from voting as continued illness was obviously the cause of Mr. Meighen's absence.

The division came on a motion by Hon. C. A. Dunning, minister of railways, for appointment of a special committee of the house to consider the Canadian National Railway estimates. Under the motion, the committee is to consist of six Liberals, six Conservatives, two Progressives and one Labor. It was against this composition that Conservative opposition was mainly directed. Conservatives wanted a membership of seven Liberals, seven Conservatives and one Progressive.

The motion was carried in its original form. W. A. Boyd, chief Conservative whip, suggested that the unanimous consent of the house be obtained to increase the membership of the committee by one; and that the additional member be appointed from Nova Scotia Conservatives. Premier King thought the resolution should pass in its existing form. Whips might hold a conference afterwards and make any recommendations to the house, subsequently which they thought desirable.

Farmer Bodies Are Planning Amalgamation

S.G.O.A. and F.U. Will Decide at Convention in July
Saskatoon.—The joint convention of Saskatchewan Grain Growers' Association and Farmers' Union of Canada, which the proposed amalgamation of the two organizations into one, United Farmers of Western Canada, Saskatchewan section, will be finally decided, for or against, has been recommended to be held in Saskatoon, July 15. Mrs. Violet McNaughton, of Hartzburg, secretary of the amalgamation committee of the two organizations, announced at the end of a meeting of the committee here. The recommendation will go to the executives of the two organizations to be ratified. It is anticipated that about two thousand delegates will be present. The S.G.O.A. and F.U., of which will convene separately first, and then will convene as one body.

To Establish Vancouver Plant

Incorporation Papers Are Issued to British Engineering Firm
Victoria.—Canadian Vickers Limited, the Canadian branch of the great British engineering and construction firm, is looking to developments in Western Canada now and to keep abreast of them is incorporating to do business with headquarters at Vancouver. Incorporation papers issued here state that the company, whose Canadian headquarters are in Montreal, is capitalized at \$5,000,000.

Prison Sentence For Spies

Three Englishmen Found Guilty By French Criminal Court
Paris.—The three Englishmen who were arrested here last December on charges of espionage, have been given prison sentences in Criminal Court. The court found they had endeavored to obtain secret documents concerning French maritime and aviation stations. At the time of their arrest it was charged that the three men were former British officers in the intelligence service of Great Britain. The British foreign office, however, denied all knowledge of the men's activity.

Forms New Ministry

Brassey—Henri Jasper, former foreign minister, has consented to form a ministry to take the place of the Poulet cabinet which resigned last week.

Riot in India

Calcutta.—Five persons were killed and 21 seriously injured in disturbances which broke out between religious factions in Kharagpur, Bengal.

W. N. U. 1620

India's Only Woman Ruler Abdicates Throne

British Government Granted Request For Only Son to Succeed Her
Lucknow.—The only woman ruler, Her Highness the Begum of Bhopal, has abdicated her throne in favor of her son, Nawab Zada Hamidulla. For a long time she has been suffering from ill health. Her Highness, who under ordinary procedure should have been the son of her deceased eldest son, Nawab Nura Khan. The British Government finally acceded to her desires.

The abdication of the Begum brings to an end a period of 30 years of female rule in the little state of Central India of 8,000 square miles, with a population of about 700,000. She had ruled Bhopal for a quarter of a century with vigor and statesmanship. Although now 68 years old, she still is mentally and physically vigorous. Nevertheless, she long had wished to see her only son established as her successor before her faculties failed her.

Nawab Zada Hamidulla is now 31 years of age. He had been carefully trained in statecraft and in his mother's direction. He was on the staff of the Prince of Wales during the Prince's visit to India and served in the war. He has a splendid reputation.

Having succeeded in her efforts, it is said she retired to the care of the government.

Influence Will Not Help

Home Bank Depositors Will Be All Treated Alike
Ottawa.—"Influence or no influence has no bearing on this matter," said Premier W. L. M. King in the House of Commons regarding the payment of home bank depositors. Peter McGibbon, Conservative, Montreal, had quoted a newspaper article which said that some depositors found it difficult to obtain the promised 35 per cent. because they lacked influence.

The prime minister said influence had nothing to do with it. He understood that a group of depositors had held a meeting, discussed their position and decided to come to Ottawa. He was of the opinion that to make their representation to the government. When they come, said Mr. King, they would be received like any other delegation and their claim would be given every consideration.

Accepts Aid From Soviets

Money Refused by Trades' Unions
Goes to British Miners
Moscow.—The news agency announces that A. J. Cook, secretary of the British Miners' Federation, "has accepted with deepest thanks" the money given by the Soviet miners to aid the strikers in the British Isles. The news agency adds that Mr. Cook has requested that the money be transferred immediately to England. "The boys at the mines" need it very great.

Previous dispatches from Russia announced that the sum collected for the British miners in Soviet Russia amounted to about \$1,000,000. The money was offered to the British Trades Union Congress during the recent general strike, but was declined.

Storms Have Ruined French Fruit Crop

Unless Weather Improves Soon Cattle Are Also Threatened
Paris.—Fruit crops all over France have been ruined by snow, rain, hail and gales, while cereals are threatened. If the improvement promised by the weather forecast does not materialize quickly.

Many villages which suffered badly at the beginning of the year from floods again are menaced by rising waters, notably the Upper Marne, the Rhone and the Durance.

Train Farmer Settlers

London.—The steamer *Montenotte*, which sailed for Canada May 21, carried 30 boys who are going to Vimy Ridge training farm at Guelph, Ontario, to take a course in agriculture. The boys are going out under the Ontario Government scheme for the training of young settlers.

Meighen to Speak in Winnipeg

Ottawa.—Right Hon. Arthur Meighen will be the guest of honor at the annual convention of the Manitoba Conservative Association, to be held in Winnipeg, June 8. Mr. Meighen will be one of the chief speakers.

Neighborhoods in Balkans

Paris.—General Parakevopoulos, the new Greek premier, wishes to practice a policy of neighborhood in the Balkans, particularly with Yugoslavia, he told the French press.

Awaiting Boat To South

Members of Amundsen Expedition Housed in Cabin at Nome

Nome.—Four Arctic explorers settled down to routine life in a cabin here and continued to exchange reminiscences of their experience in flying over the top of the world.

Awaiting the arrival of a steamer the party, headed by Roald Amundsen, discoverer of the South Pole and the third to reach the North Pole, are content to rest. There were indications of a long stay, as the next boat out of Nome will not be on June 15.

The drablike Norge, the huge gas bag in which the explorers made their way through clouds, fog banks and Arctic temperatures from Spitzbergen to Teller, 75 miles from here, is to be carefully packed for shipment out of Alaska by steamer when the jet-fueled hulkier than out.

Captain Amundsen, Lincoln Ellsworth of New York, and Captain Oscar Wiisting and Lieut. Oskar Omdal, all members of the expedition, are occupying a cabin which they have christened the Explorers' Club. Here they plan to hold forth until a steamer is sighted.

Report Says Boyed Banned From States

State Department Requested His Recall to Germany During War

Berlin.—Captain Karl Boyed is said to have been refused a visa to enter the United States. The passport bureau of the state department is declared to have regarded the time too short since his war activities when naval attaché of the German embassy at Washington, to permit him to re-enter the country.

He was recalled by Germany at the request of the state department in 1914 because of his military and naval activities.

MAJORITY OF 13 FOR GOVERNMENT ON BUDGET VOTE

Ottawa.—After over a month of debate ending in an all-night sitting, the house defeated the Conservative amendment to the budget by a majority of 13. The vote stood: Aye, 121; No, 108.

An unusual feature of the division was that neither Premier King nor Right Hon. Arthur Meighen, Opposition leader, cast a vote.

Mr. Meighen was absent through illness. Mr. King was paired with Mr. Meighen. There were no party switches. Liberals present voted solidly against the amendment. Conservatives voted solidly for it. Progressives, Independents and Labor voted with the government.

Announcement of the result was greeted with loud cheers. The issue then again divided on the main budget motion.

REDUCTION OF ARMAMENTS IS DIFFICULT TASK

Geneva.—Nations will fear to disarm, but nations actually are weaker but potentially stronger, can in the long run conquer them—that is the supreme stumbling block to disarmament which hinders at the opening of the preparatory committee. France mentioned it, Belgium, overwhelmed in the great War, emphasized it anxiously, and Premier Mussolini's spokesman even declared: "If you do not take account of every kind of potential military strength in a country, then you show a desire to weaken a weak state and strengthen a rival one."

Vicent Credi frankly declared that Britain's responsibilities to her overseas possessions or mandated territories were the cause of her reductions in her land forces and also probably in the number of British cruisers, but he thought that reductions could be made by agreement in the size of the cruisers and in the number of submarines.

You have said that the British people were "paradoxically desirous" of securing a reduction of armaments—"one of the chief causes of that high taxation which leads to unemployment."

Ban On Fortune Telling

Pastime Will Be Prohibited In Vancouver In Future

Vancouver.—While palmistry, phrenology and astrology are recognized as sciences under the Canadian criminal code, and persons practicing them are eligible to receive civil licenses, fortune telling by tea-cup "readings" and cards are illegal, and will be banned in Vancouver hereafter, states Clarence, city license inspector.

The practice of giving free readings of the future in Vancouver tea shops and beauty parlors has lately achieved great popularity, said Mr. Jones, permitting it to continue will be liable to cancellation of their business licenses and to police action under the criminal code.

Red Lake Railway Bill Defeated

Ottawa.—After a few minutes debate the entire committee of the house rejected a bill for the construction of a railway line from Quilbut, Ont., to the Canadian National about 100 miles north to the new gold mining district of Red Lake. The committee's decision came on the preamble of the bill which was defeated by 20 to 13 rejecting the bill itself.

Gather Strawberry Crop

Saskatoon.—British Columbia Indians can enter Washington State to help harvest a \$1,500,000 Puget Sound strawberry crop under a United States department of labor ruling. The Indians are required to register on entering and to leave within a reasonable time. The berries are ripening two or three weeks ahead this year.

Will Explore Ungava Territory

Expedition Will Make the Trip in Three Aeroplanes

Quebec.—What is considered the most important expedition that has ever been sent out by the Provincial Government will take the Severn hills in June next by aeroplane, for a long exploration trip in the vast territory of Ungava. The expedition will be under the direction of Henri Belonger, well known surveyor, who has several similar undertakings to his credit already, and will comprise about fifty men and be divided into three parties, with Mr. Belonger, Paul Savard and Arlen Chailford as the respective leaders.

The whole expedition will be accomplished in three aeroplanes. The principal aim of the expedition is the preparation of a detailed report on McLean's Fall, considered the largest falls in Canada, 800 feet in height, and three-quarters of a mile wide. More than 1,000 miles will be covered by the explorers during the four months they expect to be absent.

Oppose Suggestion For Canadian Standard

Management of Historical Association Would Keep Union Jack

Ottawa.—The management committee of the Canadian Historical Association, in its report presented at the annual meeting of the association here, expressed "its strong disapproval of any attempt to substitute another flag for the Union Jack as the Canadian standard."

A motion to this effect was passed last fall by the British Columbia Historical Association and copies of it were sent to all other provincial historical associations. The management committee states that "so far as the matter has been received, the consensus of opinion appears to be in sympathy with that of the British Columbia Historical Association."

The report adds that it does not think it advisable to take any further action.

Gold Deposits Found Near Arctic Circle

Are Bodies Were Discovered By Electrical Prospecting Methods
Stockholm.—New gold deposits, the largest in the entire world, have been discovered by electrical prospecting methods developed by the Swedish and Karl Sundberg, mining engineers, at Boldden in the province of Vasterbotten, not far south of the Arctic Circle.

Whether 24 ore bodies have been located in this region, all covered by a great drift, swamp or lakes.

The deposit was traced through the ice at the bottom of a lake 30 feet down.

Besides gold these ore bodies have been found to contain copper, zinc, arsenic, sulphur and pyrites.

DEADLY STRIKE HAS DISASTROUS TO LABOR CAUSE

London.—Severe criticism of the general strike was voiced by Frank Hodges, secretary of the International Miners' Federation since 1925. In a press interview he characterized the strike as "a disaster motivated by blind passion to try out a machine which, though perfect on paper, had no account of simple human nature and economic forces."

He declared that the gigantic effort of the Trades Union Congress was a mere toy in the presence of the economic facts and social forces with which it was confronted.

Mr. Hodges maintains that the miners' present fight is "a futile and suicidal sacrifice against insurmountable economic facts," and that prudent leadership would dictate that the miners should not be permitted to go further and fare worse.

Ramsay MacDonald, the leader of the parliamentary Labor group, speaking in behalf of the Labor candidate at the Hammersmith by-election, strongly attacked the government for breaking off the negotiations which would have ended the general strike.

As to whether the general strike had been successful, Mr. MacDonald said: "Was the position of the government better after the strike than it was before the strike? Of course it was not."

If Premier Baldwin at the end of the general strike had done what we asked him again and again to do, there would have been no strike at all. And he did it within two days after the calling off of the strike."

CROP PROSPECTS ARE REPORTED TO BE EXCELLENT

Quebec.—Crop prospects in general are exceedingly good, although the season is a little late in some parts of Eastern Canada, says Hon. W. R. Miller, minister of agriculture, in a statement on the crop situation. Advice from the Maritime Provinces indicate that the season is from ten days to three weeks late, which means that very little seeding has yet been done," continues the statement. In Quebec also the season is late and but little seeding has yet been done in the western and southern parts of the province, and none in the eastern and northern areas.

In Eastern Ontario seeding is well under way, but the season is quite late in the north, while in Western Ontario seeding was finished only a week ago, much later than usual. Wheat seeding has been completed in Manitoba, and good progress is being made with coarse grain. Grain appears to be germinating well and growing an excellent stand.

Excellent prospects are reported from Saskatchewan where wheat seeding is practically completed and good progress is being made with the seeding of other crops. The season is ahead of last year, and early wheat is already above the ground promising an excellent crop.

Following an open winter in Alberta, spring work is well advanced and the season is earlier than usual. In Grand Prairie, the early maturing Northwest of Ontario, caragana is already in full bloom. Wheat is generally all seeded, as far north as Vermilion, and the recent general rains have ensured good germination.

Harvesting is completed in British Columbia and in this province and the prairies mild weather has ensured full yield and pastures coming through without any winter killing.

Cost Of Publishing Government Paper

Britain Spent \$2,200 Printing Gazette During General Strike
Gazette During General Strike. The British Gazette, the government paper, during the general strike cost approximately \$2,200.

Winston Churchill, chancellor of the exchequer, who was editor of the temporary paper, says he regards this as a surprisingly small sum of money. "Had the strike lasted longer than three days," he said, "the Gazette would have assumed a paying basis, and the strike would have been much better off the end of the strike."

Mr. Churchill admitted a good many free copies of The Gazette were sent.

Practically the only people in the newspaper world now unwilling to contribute to the strike are the mailers. As a consequence the large distributing houses, for newspapers have declared that in future such houses will not carry union houses as they were previous to the general strike.

Germany Changes Loan Market

U. S. Has Been Supplied By Britain and Holland

Berlin.—The United States, which has long been about the only money lender market available to Germany, has been superseded by Great Britain and Holland, says a report by the Deutsche Gesellschaft, one of the large Berlin banks. The report shows that Germany, since January 1, raised loans aggregating 2,650,000 marks (\$730,000,000) of which 1,380,000,000 marks were raised abroad and \$75,000,000 at home.

Call U. S. "Shylock of World"

Toronto.—Hated still existing between various European nations meant that there was danger of another war among the Europeans. Hon. James W. Gerard, former United States ambassador to Germany, declared in an address here. He also referred to the United States as "the shylock of the world" in connection with its attitude on war debts.

French-German Air Accord

Le Bourget, France.—The first commercial aeroplane company from Germany since the recent aviation accord reached between France and Germany has arrived here. The plane arrived seven passengers.

Drought in Philippines

Manila.—The stricken people have been parched with heat and drought. Manila has been almost without rain for five months, and there is an acute shortage of water.

Chips of the Old Block for Canada

Here are a few examples of the class of settler that is being brought over to Canada by the Canadian Pacific Railway. Of the best British stock they took the part and a fine crowd of children and young people could be found anywhere in the world. Catch them at this age and they are complete Canadians in a few years. Take first the Nicol family from Wiltshire, Scotland, who are settling at Elmer-

ton, father and mother, two girls and four boys. - Then there is the Shivers family from Birmingham, England, also two boys and girls, bound for Saskatoon. Finally there are Annie Jeffrey and Mary, the children of F. Hold, of Fleetwood, Lancashire, also bound for Saskatoon. These are the type of immigrant that Canada is hungry for and is always glad to have. Above are shown the Nicol family. Gail—Annie, Jeffrey and Mary.

There Is A Canadian Race

People Born in This Country of Mixed Heritage Yet to be Categorized

We have yet to hear any sensible reason advanced why a native Canadian of mixed ancestry, should be forbidden to answer "Canadian" when he is asked this question by a census enumerator: "Of what racial or tribal origin are you?"

The present system by which "Canadians" of the second, third, fourth, fifth and sixth generations have to grope back through the family tree to their original paternal ancestor from Europe in order that they may answer "Scottish," "English," "French," "Irish," "German," and so forth, is defended by the census authorities upon the ground that "the object of this question" (as to racial origin) "is to ascertain from what basic ethnic stocks the present Canadian population, more particularly the recently immigrated population, is derived."

The effective reply to that is that the existing system this information is not obtained. Anything more absurdly unscientific than this method of identifying the "basic ethnic stocks" of the Canadian population could not be devised. Every person, within the scope of his own knowledge, can tell the case after case where the census method of identifying ethnic origin is far from being sound. Take the case of a family three of whose grand parents came from England, France and Germany, the fourth being a Canadian. To what "race" do they belong according to the census enumerators? In the census enumerators' methods by which our census takers select racial origin? They are, if you please, Germans.

An attempt is made to break the force of criticisms of this character by pointing out that the census does recognize "Canadian race" as a "nationality," in official terminology, means only "citizenship." The word "nationality" has many meanings, but the one which is in the census is the "people" when they use it is that which is defined by the dictionary as "the people constituting a particular nation; a nation; a race of people." Canadian nationality in this sense is not recognized by the census regulations. Instead it is expressly, can be seen there is no room in our records for the word "Canadian" as representing race. They register sources of other "races," but the Canadian race is nonexistent. No matter how long our families may have been on this continent we are still English, or Irish, or Scotch, or Welsh, or English.

No, in contradiction to all this we maintain that there is a race of Canadians. The evidence that there is such a people is to be seen in all men in the form of hundreds of thousands of men, women and children, who can claim to be able to read and write in English, not Scotch, not Irish, not continental European. They are Canadians and holding citizenship in this country. It is time that they should wear notice on the government of this country that they do not propose to put up longer with this particular insult which they have to stomach every time they enter a room, a restaurant or fill out a vital statistics form.

The issue is perfectly simple. It is that people born in this country of mixed parentage are entitled to be enrolled in the citizenship records of this country as belonging to the Canadian race—Free Press.

Work Nights If Necessary

Immigrants Leave Urgent Piece of Work Undone

So and that was the case in the last few days when the men who were working on night shifts to get their jobs done were being observed by Miss F. H. Chalmers, formerly operator at that department.

A colony of sleepless men, she reported, were now known to be at work. The temperature was below 12 degrees Fahrenheit, and no worker was visible after sundown; but on one occasion when the workers were engaged in building the entrance to the next they worked on it all day and ran into the night at a temperature of 65 degrees.

It is not unusual for the socialists to work on night shifts when there is an urgent piece of work to be done.

Irrigation Convention
The Western Canadian Irrigation convention will be held this year at Medicine Hat on July 27, 28 and 29. The feature of the convention will be an address by I. D. O'Connell, of Billings, Montana, who is a specialist on the growing of sugar beets in irrigated districts. On this account this meeting should be particularly interesting.

W. N. T. 1929

Chinese Were First To Use Wallpaper

Put Up Strip Every Time Death of Relative Occurred

Chinese families at one time commemorated the deaths of their relatives by putting up a strip of wallpaper every time a death occurred. This extraordinary method of paying tribute to the dead is revealed in the "History of English Wallpaper," by Mr. A. V. Sugden and Mr. J. L. J. 101.

China was the first nation to make use of wallpaper. Traces have been discovered of wallpapers being used for ritual purposes 2,000 years ago. Signs of animals were the forerunner of the existing wallpaper in England, and were later succeeded by tapestries and painted cloths.

Wallpaper discovered some years ago at Christ's College, Cambridge, is now believed to be the first specimen of genuine wallpaper made in England. Its date was approximately 1569, for on the other side of the paper appeared a poem composed by the death of Henry VII, and a proclamation of Henry VIII.

The paper was found on some old beams, and was carefully collected by the order of Sir Arthur Shipley, Master of Christ's College, Cambridge.

Producers and Consumers

Goods Made Are Those People Can Afford to Buy

People sometimes wonder why more fine work is not produced. The tendency is to place the blame on the producer. Yet it does not belong to them. There are few producers who would not like to make finer products, and there are few consumers who would not like to buy finer products.

The producers make what the consumers can afford to buy. Most producers are poor producers because of the production of my necessities and use them to pay the losses involved in the production of beautiful luxuries. There is no lack of money in the world, but there is a lack of consumers who can afford fine things. They want many fine things, but can buy only a few.

The general standard of excellence should advance a few notches each year. We might move forward faster if we would learn to get satisfaction from the ownership of a few fine things rather than many mediocre.

By William Fisher.

The Fish-Gods of Hawaii

Queer Superstition Held by Fisherman Also Prevailed Among Polynesians

On the Mohaka plain near Honolulu is the abode of the Fish-Gods. Here are the Pyramid Rocks of black lava, and the Fish-Gods are blocks of black lava, standing upright upon a rock platform.

The Fish-Gods are called "Au-Maka" and the chief Fish-God is "Kauai." He is no fish-shaped god, as the name "fish" implies, but sacrifices were brought to him for abundant catches. Alai, the son of Kauai, was the one who first revealed the location of the deep-sea fishing grounds to the fishermen. Undoubtedly the same beliefs prevailed among the Polynesians, as is seen even today in the Dance of the Waves in Fiji, which is the survival of an ancient ceremonial dance of the fishermen, held at times of festivals and sacrifices to the Fish-Gods.

This Old World

"In the world round" a school man asked the little boy.
"No'm."
"It isn't, eh? Is it that, then?"
"No'm."
"Are you round, child? If the world isn't round, and isn't that, what platform."
"Pop says it's round."—Pittsburgh Courier.

Everything Just Lovely

Burglar—"Are the people of the house?"
Servant—"Ka, they're all out."
Burglar—"Have you paid your dog license?"
Servant—"We haven't any dog."
Burglar—"Well, then, I've come to use the piano."—Pittsburgh Courier.

Alberta National Parks

It is estimated that 150,000 people visited the National Parks of Alberta during the past year. Assuming that but only half of these were from outside of the province and that each spent only \$100 during his stay, the money brought into the province by this traffic would be \$15,000,000.

A man may be handicapped by being born a poet, but there is no reason why he shouldn't brace up and make something of himself.

Man is funny. He smokes for the effect on himself, not for the effect on spectators.

Everlasting Flowers

Can Be Easily Grown and Preserved For Use in Winter Months

Many of our homes are much happier for flowers than they are for the winter months. With a little forethought and a bit of ground one can have bloom during the whole winter months. Until one has learned to grow one's own fresh flowers from bulbs planted in the autumn, the housewife may be held by the use of everlasting flowers sometimes termed "strawflowers," of which there are many varieties. In a new bulletin on "Annual Flowers," recently issued by the horticultural division of the experimental farm at Ottawa, the Heilichium Bracteosum in its many varieties is said to be the best of all everlasting flowers. They are described by Miss Isabella Treason, the author of the bulletin, as rather coarse looking plants from three feet in height. They are grown from seed like other annuals and cultivated similarly during the summer months. For winter bouquets Miss Treason recommends cutting the flowers when half open, tying them up in small bunches which are hung head downwards in a dry place. The large flowers, pale pink, bright red and yellow, take pink, bright red and deep maroon.

More dainty kinds of everlasting flowers are found in varieties of Helianthus. These come in both single and double form and in different shades. Miss Treason's treatise on annual flowers, available at the publications branch of the department of agriculture, is based on experience gained by years at the experimental farm with annual flowers of all descriptions, which are described both as to the flowers themselves, the purpose for which they may be used and their cultivation.

Does Advertising Pay?

Man Proved To His Own Satisfaction That It Does

A man who used to sell his private house, placed the particulars with a local real estate dealer. He was used of living in the same house for five years and was looking for something new.

An advertisement appeared in the real estate column of a newspaper which very was appealed to him. Instead of the owner's name being printed, a box number was substituted. The man immediately wrote for further details.

The next day he received a letter from the real estate man with whom he had placed the particulars of his own house, and was surprised to learn that he had answered his own want. The reading matter of the ad impressed him so that he decided not to sell his house.

Talk isn't cheap when you have to live a larger to do it for you.

Alfalfa's Place In Rotation

Alfalfa Soil Free From Weeds That Summer-Laid Alfalfa

Alfalfa is not well adapted to short seasons owing to the high price of seed and the value of an established field that is likely to remain productive for many years. In summer rotation for alfalfa at the Brandon, Man., Dominion experimental farm, exactly one-half of the land was required for alfalfa, and the seed was broken at the end of the fourth crop year. Such a rotation, says Mr. Sifton, in his bulletin on "Alfalfa in Manitoba," published by the department of agriculture at Ottawa, is well adapted to dairy farming or where much livestock is kept.

Alfalfa seems to thrive on soil varying from heavy clays to coarser-grained sandy soils, provided there is natural drainage, but does best on rich loamy soil, with a permeable subsoil well supplied with moisture. It can be successfully grown on summer-laid alfalfa in a rotation of medium duration by having one more field than there are years in the rotation, states Mr. Sifton. In this case he says the alfalfa should be seeded down in the most favorable part of the rotation, preferably with a light crop of wheat and on summer-laid alfalfa or following an intertilled crop. The field would then remain in alfalfa until the other crops had completed one cycle of the rotation and a stand established on another field.

The alfalfa, said Mr. Sifton, can most profitably be followed in the rotation by some crop that is a heavy feeder on soil nitrogen and requires clean land. Alfalfa is usually free from weeds than summer-laid alfalfa, hence is well adapted to grazing wheat.

Dialing an alfalfa field in the early spring after cropping for two years to be drilled and will invigorate the crop by destroying weeds and aerating the soil. If the disk harrow is not set at too great an angle the crop will not be damaged.

Crime Is England

Comparatively Slight British Enforcement of Laws Is Best in World

Today England's enforcement of criminal law is the best in the world and compared with the United States there is little crime there. In one year 1,000,000 cases were tried in England, while New York had 260 and Chicago 137. In 1922 and 1923 England had no unsolved murder.

Air Station For Edmonton

Interests in Detroit, Belmont and Fort William, at the head of the lake, have opened negotiations for establishment of an air field and dome at Edmonton in anticipation of a national air route in the future.

"Worthy Of Emulation"

A Jack Miner League With A Jack Miner Creed

Essex County seems determined to set the example for nature lovers, says the Toronto Globe. In organizing a Jack Miner League with a Jack Miner Creed, it is committed to a programme which should quicken the heart of the whole country if it would at last long enough to consider what it means. Only a little of it is the outdoor life, and other predators, birds and animals. It goes so far as to encourage country life with all that it involves: a home among the trees, the birds and the flowers, especially for the children, who should be taught to love the outdoors by more wild nature studies in the schools. It opposes the commercialization of game, stands for forest preservation, the maintenance of waste lands and other natural environment for wild life, protection of streams, development of fisheries, culture of flowers and other plants, a bird sanctuary in every county, and, in general, a complete campaign in behalf of nature.

This is something new and comprehensive in nature lovers' clubs. It is an idea big enough to interest a large proportion of the people in the province, worthy of emulation in every county. It combines the aesthetic with the utilitarian, and offers a practical outlet for a variety of tastes. The authority which a large number of such clubs could exercise in behalf of nature study and protective measures would be great. Its educational effect might be more far-reaching in the back-to-the-land urge than any amount of academic culture.

Here is a chance for kindred spirits throughout Ontario to enjoy the great outdoors in a common cause and at the same time perpetuate a worthy name.

Altitude Makes A Difference

Water Boils Quicker At Sea Level Than In Mountains

When cooking three-minute bologues aboard a dinner while in the Rocky Mountains, the waiter where your house is and then do not become impatient if five minutes pass before he places your "three-minute eggs" before you. Paul Reels, a railway chef, explains that five minutes pass before he places your "three-minute eggs" before you. Paul Reels, a railway chef, explains that five minutes pass before he places your "three-minute eggs" before you.

In many sections of the west, the cooking which at sea level requires only two or three minutes to prepare properly. "Down in the Rockies," says Paul Reels, "the boiling point is 212 degrees because San Francisco is practically at sea level," says Mr. Reels in an interview in the American Magazine. "But where the atmosphere is lighter the boiling point is only about 199 degrees." So you can see it takes longer to boil a three-minute egg at high altitudes than it does at sea level.

Scenic Wonders In The West

Alaska and Louise Falls In North-west Territories Are Of Great Interest

Hidden within the recesses of Canada's north country, less than fifty miles from the important trading port and military station of Hay River on Great Slave Lake, but sufficiently of the regular routes of travel to have been visited by only a bare handful of explorers, are two of the most wonderful cañons in the Dominion. These are the Alexandra Falls and the Louise Falls, situated within about a mile of each other on the Hay River.

During the course of surveys carried on last summer along the Hay River for the department of the Interior, a topographical survey party spent several days in the immediate vicinity of the falls. The members of the party were greatly impressed by the scene, and the surveyor in charge reports that it is scarcely possible to exaggerate the extraordinary beauty of the scene.

In describing the majesty of the setting of Alexandra Falls or the sheer beauty of Louise Falls, the observer who formed the party around a bend half a mile above Alexandra falls, reaching in a tumult of swift water and foam, to pour over a sheer precipice 100 feet high, and then dash down a thundering force that makes the earth quiver. Clouds of spray rise to the canyon's rim, where the sun adds to the glory of the scene by forming rainbows in the mist. Along the cliff edges are dense and thrifty growths of spruce and poplar, their colorful foliage in every stage of decay. Alexandra falls are not in themselves the sole item of beauty here though the scene is more beautiful from the several points. It is in the drop of the entire river that one is most impressed with a sense of unlimited majesty and grandeur.

The river, after flowing a mile through the canyon, comes to a second bend and drops fifty feet, this time forming Louise Falls. When it approaches up the beach of the lower canyon and rounds the point, the Louise Falls may be seen to best advantage. The falls are a series of dark wooded cliffs is a bit of fairyland, a world of foam pouring out of the darkness and light.

These falls were discovered by Dr. W. C. Boumas, Assistant Director of the Geological Survey, in 1912 when on a tour of the Northwest Territories. He was accompanied by Miss Alexandra and Louise respectively, after the late John Alexandra and the Princess Louise.

Farm Home Should Have Name

And It Should Appear On Products Offered For Sale

"Name your farm" is the slogan of a movement fostered in Tennessee for the past four years. More than 1,000 homes have already been named, according to a report received by the United States department of agriculture. Farm homes were designated to give some thought and trouble to the selection of the right name. It should be dignified, suitable, and not only common, but easy to say, easy to read, and easy to remember. It should appear on the mail box or over it, or on a signboard, or on the gate. It is believed that it should be used on letterheads and on the label of anything sold from the farm. The indirect effect of the name can often be seen in the grading and standardization of products offered for sale.

Clean Horses By Vacuum Method

Curry Comb and Brush Not Needed For Dabbling With This Process

United States army horses and mules at Fort Benjamin Harrison, near Indianapolis, are being cleaned by the vacuum method. Furthermore, even the mules are not only cleaned, but easy to say, easy to read, and easy to remember. It should appear on the mail box or over it, or on a signboard, or on the gate. It is believed that it should be used on letterheads and on the label of anything sold from the farm. The indirect effect of the name can often be seen in the grading and standardization of products offered for sale.

The new device is said to have solved the problem of caring for extra mail with a minimum of effort and time and results in a more thorough job of cleaning than was ever possible with curry comb and brush. The nozzle of the machine is equipped with a brush of special design.

The Average Tip

A wealthy man asked a Pullman porter the amount of his average tip. The porter replied that the average was one dollar. The wealthy man, who was a Pullman porter, handed him a dollar, whereupon the porter asked him how much he had ever come up to the average.—Marketing, Toronto.

Spring Isn't Perfect

The Women Placed by Lord Byng at Vancouver. L. His Excellency Talking to C.P.R. Policemen. A Lady Byng Talking to Mayor L. D. Taylor of Vancouver. R. Governor-General Byng and Sir H. Stewart, his former chamberlain in France.

Final Official Tour of Governor-General Byng

Lord Byng, Governor-General of Canada, and Lady Byng made a tour of Canada recently, leaving Ottawa on a special Canadian Pacific Railway train for the trip. This was the last tour the Governor-General made officially across the Dominion. The vice-regal party made farewell to the great anxiety of the West, the Canadian Rockies and the Pacific Coast.

From Ottawa, the party went on an eleven-hour non-stop run to Winnipeg Lake in the twin cities of Northern Ontario where they rested for the night. The next day they left for Nipigon and on to Twin Cities, Port Arthur and Fort William, at the head of the lakes. The party spent several days in Winnipeg, where Lord Byng saw several of his many friends.

The train made an overnight stop at the Indian Reserve at Morley, continuing the following morning through the Rockies where they viewed some of the world-famous scenic spots at Wapta, Lake, Twin Falls and Notoch Hill. On the way across Lord Byng suffered an account of his leg, but at Vancouver he was sufficiently recovered to receive the ovations of huge crowds of cheering citizens. Here Lord Byng attended public receptions and laid a wreath on the monument "To Our Glorious Dead, 1914-1919." His Excellency planned to be back in Ottawa by June 1.

The mental picture of the Canadian west is a vision splendid. Were one a looker to view the scene from above Winnipeg, the eastern gateway of the prairies, and have his range of vision sufficiently extended, he would see a vast, level, featureless plain, a gently rolling, fertile plain, gradually rising to the foothills of the Rocky Mountains, over nine hundred miles away. On the right, the northern edge

CHAPTER V.—(Continued)

"Say, you!" she said, her lips set, "you're just about the same as a new rim in an old pair of stockings to me, but you're running the wrong way. I'm saying goodbye now, and we'll probably never say hello again, but I'd like you to remember that you're in on the start of something today that's going to have a big finish."

He made no reply, but just looked at her, somewhat unconsciously, she added, irrelevantly it seemed:

"And it didn't start the way you think and it won't finish the way you expect, take it from me!" Then, her flowers hugged close, she went into the house.

Mrs. Adams was a dear old soul, or a mean old termagant, according to whether you owed your room rent or not. Not that she was so much different, under the latter circumstances, but the general aspects of her seemed different. As a matter of fact, she was good for four weeks of arrears for any girl and said that, "why, as many more as a girl required if she was in real hard luck and actually trying to get out of it. Joanna, herself, had once comforted a girl friend, who had mortgaged her room rent for two weeks ahead on a dress she couldn't afford with "Never mind, dearie!" The first week's the hardest. After that she'll pay for you, and I guess that won't do you any harm, either."

Mrs. Adams was breathless with curiosity when Joanna faced her in the drawing room which failed its proper destination from the iron clad rule which the landlady laid down meticulously to get out of her. "My young ladies receive their company at the other sex in the drawing room only. Her young ladies customarily referred to the big front room downstairs and the two upstairs bedrooms and the three overwrought thins in faded red, as "the drawing room only." Joanna, speechless for a moment, showed her flowers into the landlady's arms. At the same time she noticed that the old lady had taken off her apron. Behind her, with her apron off, it gave her something easy to talk about as a starter:

"I didn't know it was you getting."

RESTORED TO GOOD HEALTH

Mother of Eleven Children
Praises Lydia E. Pinkham's
Vegetable Compound
Her Interesting Experience

Buckingham, Quebec. "I am the mother of eleven living children, and my baby is five months old. I am only 35 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and nervousness and I know of it from my own experience. For five years I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has taken it and will be happy to recommend it to all young girls."—Daisy Jones, 127, Box 414, Buckingham, Quebec.

Why suffer for years with backache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent county-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 reports were received, and 90 out of every 100 reported they were benefited by its use.

W. N. D. 14690

to the million dollars the landlady patted her hair and tucked in a grey wrap that hung down behind; but when the girl came to the end she was silent, motionless, and she kept her hands folded in her lap.

Joanna went over and kissed her on the top of her head, lightly, and she didn't respond to that, which Joanna understood. That was a lot of news that had been thrown at her.

"Now I'm going upstairs and try to cry," said Joanna, gathering her new coat on her arms and giving the bundle that held her old one a kick into a corner where she could salvage it later. "And if I can't cry I'm going to laugh. If I can't do that either I'll try standing on my head and see if I can figure things out that way." She didn't notice a sad little shake of the head which the landlady sent her way.

She turned to the door, but stopped, and opened her bag. She selected the crisp of the five hundred dollar note, went over to the grey-haired Mrs. Adams, showed her the size of it, and then crumpled it in the old lady's tail more fingers. Mrs. Adams, with her wet, troubled eyes, looked into the girl's face, and would have said something, but Joanna stopped her by putting a hand over her mouth.

"Just keep the lid on the 'don't want to take it stuff,' she said. 'I know you couldn't think of accepting it, and it isn't coming to you, and I only owe you for two weeks—but I've got to give something to somebody, haven't I?'"

She was going out the door, but she stopped again, and turned around. Mrs. Adams still was looking at her. She struck a pose that she considered was particularly appropriate for the framing of a doorway—body leaning against one side of the door frame, hand stretched across to the other and her chin turned across a shoulder into the room:

"There's one thing you can do, Mrs. Landlady-mine," she said. "You can let me stay here till I get ready to spread it, and you can keep your other flappers out of the 'drawing room only' for tonight, because my John's coming around on his regular date and when he gets here I'll need the whole darn room for a lot of heavy stuff."

"To be continued."

A MEDICINE THAT GIVES STRENGTH

New Health Comes to Those Who Build Up Their Blood by the Use of Dr. Williams' Pink Pills.

Dr. Williams' Pink Pills are a strengthening medicine. Surely and effectively they build up the blood, invigorate the appetite, tone up the digestion, give brightness to the eyes, lead to the cheeks and lips, and quicken the step. These pills have direct action on the blood, making it a health-bearing stream; thus no part of the body can escape their beneficial action. Weak men and women, boys and girls find new health and strength through the use of this invigorated blood builder.

Dr. N. H. Langley, C.N.E., agent at New Germany, N.S., says: "In November, 1914, I had a severe illness which left me in a very weak condition. I was recommended Dr. Williams' Pink Pills and derived great benefit from them. My appetite improved, and a gain in weight which is now normal I owe to the use of this medicine. I can now recommend Dr. Williams' Pink Pills as a tonic."

Try Dr. Williams' Pink Pills for anemia, rheumatism, neuritis, nervousness. Take them as directed. You are not in the best physical condition and cultivate a resistance that will keep you well and strong. Get a box from the nearest drug store or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Among the good that die young in this hard-boiled age is good manners.

It is estimated that over 5,000,000 bicycles are used in Japan.

Will Exhibit White Elephant

Sacred Beast From Burma To Tour America

America is to see a real white elephant. The sacred white elephant from Burma, which made its premier debut at the London Zoo, May 1, will remain there for four months and then go to the United States.

This elephant is a pinkish white all over and is regarded as a sacred beast in Burma. A special bungalow was erected for the animal, which cannot be sheltered with other elephants, because of its sacred character.

Cheapest of all Oils.—Considering the qualities of Dr. Thomas' Electric Oil, the cheapest of all preparations offered to the public. It is to be found in every drug store, from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

And This Is England

Journalist Tells Sad Story of Anglicanism in London

Here is a sad story told by an English journalist in one of the London papers: "As I walked along the Strand an American clerk informed that it was then 6.15 p.m. in New York City. Those American clocks, burning American motor spirit, busied just taking people home from seeing American plays and American films, past American candy and five-and-ten-cent stores, American soda fountains and shops full of American cameras, typewriters and tooth paste. It was every word true—a hatbox flung past, a ghost from the '90s, and England was herself again."—New York Times.

Objects To Parole System

Prisoner's Temporary Good Behavior Does Not Warrant Freedom

Any bad man is likely to be good while he is locked up in prison. That he will be almost certainly be pardoned or paroled. It needs something more than temporary good behavior to warrant the freedom of a man who has been confined by order of a judge and jury. There is some explaining to be done—Los Angeles Times.

Mother's Worms' Powder not only makes the infantine system vulnerable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon it and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Long Journey Made By Bottles

Many Committed to Waves Ridden Thousands of Miles Before

Coming to Shore. A bottle thrown into the sea by the United States Fishery Bureau off Chatham, Mass., was recently picked up at Brighton, England, having accomplished its voyage across the Atlantic in just two years, says the Manchester Guardian. Similar expeditions over a considerable number of years by Capt. Simpson, F.R.S., yielded some interesting results.

Of several thousand bottles which he committed to the waves about 10 per cent. were picked up in various parts of the world, and the particular one asked for in the letter enclosed in each bottle were supplied by the finders. Many of these bottles drifted 10,000 miles before coming ashore, at the average rate of travel working out at about half a mile an hour. One of Captain Simpson's bottles took about one-half year on its sea trip, in which time it travelled from Cape Town to the Shetland Islands.

Minard's Liniment for backache

May Restore Ancient Legend

Facts That Would Almost Prove Moon Has Effect On Plants

The belief, always rooted at by scientists, that led some farmers, religiously, to plant their crops in certain phases of the moon, may yet receive some support. Some time ago scientists began to discover that certain living creatures, notably some species of seaweed and some species of grass, dwelling warm, possessed a distinct lunar periodicity. They fruited or bred or came to the surface or did other quite definite things in exact correspondence with the phases of the moon. It seemed almost as though they had an almanac. Now there has come to light another fact that seems likely to explain this one.

It has been found that the kind of light called polarized light is more effective in certain of the chemical processes of life than is ordinary light. Moonlight is partly polarized. It is composed in part of this same kind of light which scientists now find peculiar in its actions on living matter. Possibly moonlight really does have a different effect on plants and animals than does sunlight decreased to the same intensity. This would explain the apparent moon knowledge of the sea worms and the sea weeds. It would restore another ancient legend of mankind to an honored place among the truths of observation.

Has Unique Privilege

One Englishman Can Keep Hat On In King's Presence

To Michael Constantine de Courcy, Baron Kingsale, belongs the unique privilege of being the only man in the United Kingdom who may, if he so elects, keep on his hat in the presence of the King of England. A hereditary privilege granted to Sir John de Courcy in the reign of King John, for conquering Ulster, is the reason the poor noble's curious privilege. Historical records show the permission to have been exercised only five times, the last instance being in 1559, when John de Courcy, successor of Gerald, Lord Kingsale, stood with his head covered in the presence of Queen Victoria.

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. "Used as a liniment, the oil is rubbed in to the skin, and when used as a dressing to the face, the directions are so simple and unambiguous that they are readily understood by young or old."

Little Helps For This Week

Verily I say unto you, whosoever shall not receive the Kingdom of God as a little child, he shall not enter therein.—Mark x, 15.

Do like a child, and lean and rest upon your Father's arm. Pour out thy troubles on His breast. And thou shalt know no sorrow. These shall thou by His hand be brought.

By what way now thou knowest not, I will through a well-lighted path. To heavenly peace and light.—Paul Gerhard.

Our Father, who art in all perfect being the longing of The children.—The child, who is all and altogether Thee. Thou wilt make us pure and loving and free. We shall stand fearless in Thy presence, blame perfect. For we shall let the heart of a child be given to us, that we may arise from the grave of our dead selves, and die no more, but see face to face the God of the living.—George MacDonald.

Could Hardly Live for Asthma. I wrote one man who after years of suffering from asthma, complete relief brought Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matches remedy gives sure help to all afflicted with asthma. Inhaled as smoke, it brings the relief long needed. Every dealer has it or can find it from him by his wholesaler.

Find Roman Ruins In Sussex Village

By College Students

Students from Oxford and Cambridge passed their spring vacation in assisting S. E. Winbolt, the archaeologist, in his excavations near Pulborough in Sussex. It has now been definitely established that the site of the explorations was some 2,000 years ago a road connecting the early Roman city of Silchester with the main road to London. Masses of archaic pottery have been brought to light, probably belonging to the first century A.D. and from these ruins and funeral urns have also been discovered. A pre-Roman beehive, queen and 16,000 miles before coming ashore, at the average rate of travel working out at about half a mile an hour. One of Captain Simpson's bottles took about one-half year on its sea trip, in which time it travelled from Cape Town to the Shetland Islands.

The authorities of University College, London, have decided to establish a new Danish lectureship in memory of Queen Alexandra.

Cut out this advertisement. Show it to your regular dealer. He has our authority to give you a special low price on a pair of these fine pails.

Applies For Patent On New Aeroplane

Military Aviator Claims His Invention

Hobbs, a former military aviator, has applied for a patent on an aeroplane which will not crash. The invention is based on the fact that 90 per cent. of all aeroplanes crash to earth head-on. The invention consists of a series of counter-weights which, in the event of a perpendicular descent, are caused to slide to the rear of the plane, thereby re-establishing its balance, aided by an auxiliary rudder.

Still Enjoying Life at 84

Thanks To That Wonderful Remedy

Mrs. F. H. Miller, 150-111 Ave. East, Vancouver, B.C., writes: "Five years ago my husband suffered terribly with severe attacks of palpitation of the heart and smothering cough. Two doctors stated that he could not possibly live six months. A friend recommended Milburn's Heart and Nerve Pills, with the result that my husband is still enjoying life at the age of 84 years."

He has improved so wonderfully that he can now climb the stairs without having these awful pains in his heart."

Put up only by The T. Millars Co., Limited, Toronto, Ont.

Memorial For Burns' Mother. "Dobbie Burns' mother is to be immortalized by means of a memorial planned by the Hamilton Burns Club. The poet's mother, who long survived her illustrious son lived for many years and died at Grant's Head, in the county of East Lothian."

English as she spoke at a Drug Store

"Gimme a tablet,"
"What kinda tablet?"
"A yellow one."
"But what is the matter with you?"
"I wanta write a letter."

An old lady walked into Judge Stewart's office.
"Are you the Judge of Reprobates?" she inquired.

"I am the Judge of Probates," replied his honor, with a smile.
"Well, that's it, I expect," answered the old lady. "You see, she went on confidentially, my husband died detested and left several little infidels, and I want to be their executioner."

Mr. Riel met with a painful accident last Thursday, when he was thrown from a buggy, and badly fractured his right arm.

About Town and Country

Mr. and Mrs. W. V. Miller and family and Mrs. J. W. Robinson motored to Medicine Hat for the week-end, returning to Oyen last night.

W. D. McPhail is moving today into the Peterson residence on Second Ave.

Harry Lamont spent the week-end in Saskatoon.

Mr. and Mrs. S. E. Trewin and family and Mr. Fred Trewin and family motored to Hardisty, the Wainwright Oil Field and Rosyth last Sunday, returning to Oyen on Monday night.

Miss Harriet Peterson and Mr. Andy Carr spent the week-end with the former's parents at Rose town.

Miss Luella Hogan was admitted to Oyen General Hospital yesterday, and an emergency operation was performed. We are informed that her condition is satisfactory.

Born—To Mr. and Mrs. Andrew Wendling, on Saturday, May 22, a daughter.

Sale of Horses at E. C. Hallman's (27-25-3, W4) on Wednesday, June 2, at 1 p.m. B.H. Dial.

LANFINE LOCALS

May 24 passed very quietly in our village. Nearly every one was away. Mr. and Mrs. Raymond spent the week-end at Watte and Mrs. John MacKenzie left for Calgary on Sunday morning, as a W. I. delegate.

We are sorry to lose Mr. and Mrs. Powers, as we were just getting nicely acquainted. Mr. Powers has gone to Craignyle and a Mr. Campbell has succeeded Mr. Powers here.

Mrs. Parker, called the other day. She enjoyed her stay at Steenville very much. We are pleased to see her back again.

The ice cream social and sale of home made cooking was well patronized. The ice cream was O.K. and a large table was filled with cooking which was nearly all sold netted a nice sum for the W. I. and the young people enjoyed the dance. Music was supplied by Mr. Powers and Miss I. Davidson.

Mr. W. K. Wilkins, returned on Friday morning from Rochester, after undergoing an operation.

Farewell Service at All Saint's Church

All Saint's Church was filled to the door last Sunday, when Rev. Remington Walker, conducted his farewell service, before leaving for Kerrobert, Sask. Previous to taking his new office Rev. Walker will visit the Synod at Regina. He will preach his first sermon at Kerrobert on June 6.

During the time Rev. Walker has been stationed at Alton, he has been an ardent worker on behalf of the little church on the corner, and it is very largely due to his splendid efforts that the property was built and is now so admirably appointed. While a large number of friends very deeply regret his departure, they will be glad to know that he is soon to pay a visit to Oyen.

A farewell party in honor of Rev. R. Walker, was held at the home of Mr. and Mrs. Thomas Thompson last Thursday evening.

The Oyen ball team got third money at Alstik tournament on Monday.

To Start New Hotel

Bids have been called for the construction of the new million dollar hotel to be built by the Great Northern Railway at Waterton National Park, Alberta.

FIFTH ANNUAL TOUR TO THE PACIFIC COAST

Special Train Leaving Winnipeg, July 5, via Canadian National Railway. Entertainment Provided at Various Points of Interest en Route.

PERSONALLY CONDUCTED

Following the close of school for the summer holidays, the Canadian National Railway will again operate its popular "personally conducted" tour to the Pacific coast. This will be the fifth of such tours.

This mode of travel has many advantages. In the first place, it is planned with a view to including in the itinerary the most interesting points, which, with the careful arrangements that are made, obviates the necessity of the passenger worrying about connections, sleeping car accommodation, meals, and entertainment en route. This is done in advance by experts, leaving the passenger free to enjoy to the full the scenery and attraction attendant to such tours.

The tour this year will commence at Winnipeg, from which point a special train of modern sleeping car, equipped with dining car and radio observation car, will leave July 5th. After stopping at various points of interest, the train will arrive at Prince Rupert on July 10th. At this latter point the party will embark on a specialized steamship for a cruise of 550 miles through the famous "Inside Passage" to Vancouver. While the tour terminates at Vancouver, those who desire to make a trip to Victoria may have their tickets read "Victoria" as their destination without any additional cost.

The local agent of the Canadian National Railway will be pleased to give you full particulars of this tour.

It's The Man Who Dares That Does

For thousands of years the human race has been chained to their fears.

Sclerizing their powers they lived in a squalor and stupidity.

They were unwilling to try out the wings of opportunity.

They refused to travel lest they might get lost.

They were afraid of unknown seas lest they might drop over.

Industry was dead, and Ambition was buried. Man, like the beast he drove, lived by hard work and long hours.

But the world moves, and opportunities are at your door

The British Nation is the greatest Nation in the world. The Dominion of Canada is the greatest Domain within that greatest nation, and the Province of Alberta is that Greatest Dominion, of that Greatest Nation, is the Greatest Province of them all.

Unquestionably ALBERTA is the greatest country in the WORLD.

Its wealth in mines cannot be measured and its richness of soil cannot be excellend.

It is for this reason that a Company of Toronto people looking for a place of remunerative investment, chose the Province of Alberta as its speculative Bank, wherein to invest their hopes for the future.

THE FUEGO OIL COMPANY LIMITED, holding a Dominion Charter, has proved itself in more ways than one as entitled to your confidence. It is not merely an Organization on paper, IT HAS BEEN DOING THINGS.

It has purchased an Equipment for drilling second to none, and has spent in actual drilling more than \$75,000.00. It has something to show. It has secured Leases from the Crown of near-

ly 11,000 acres.

It has established a credit with the Dominion Government that will pay for those leases up to 1929.

It has drilled and placed in excellent condition some 4600 feet of casing ranging all the way from 18 inch heavy drive to eight and quarter inch California D.B.X.

The drilling is on

We have started operations for 1926. The Drillers are here, and the Bits are biting their way inch by inch toward their goal objective.

How far we shall have to go we cannot say. Our drilling equipment will permit us to go 5000 feet if necessary.

Oil at Sea Level

The Turner Valley nursing the most famous gusher in the world belches forth daily some 600 barrels of the purest high test gasoline, securing its production at sea level some 3700 feet.

The Wainwright Field came in at sea level which is 2130 feet according to the latest government maps.

The Fuego Field sea level, is declared by those same government maps, to be at a depth of 2520 feet. In other words, we are only 390 feet from sea level.

The Drillers

Our drillers, Messrs. Bergman and Horne, are men of unusual experience. They hool from the fields of Pennsylvania, Louisiana, Kansas, Colorado, Oklahoma, Wyoming, Montana and California.

They declare that our Field looks for all the world like the famous Oklahoma oil lands. In that country an oil lease covering a Quarter

Section, often sells for one million dollars and more.

The Fuego Oil Company holds Sixty Seven Quarter Sections.

One of our Drillers of national reputation and known everywhere as "Whitney" Bergman has brought in over one hundred wells, many of them gushers flowing thousands of barrels per day.

Driller Horne's experience has carried him through the leading oil fields of America and as far as Japan. Both of these men are exuberantly optimistic over the outlook of the Fuego Field.

An Unprecedented Opportunity

Ordinary Oil Companies sell you interest in but one well only or perhaps in an acreage covering only three or four acres, and much of their stock is of the preferred type reserved for the select manipulator.

The Fuego Oil Company selling stock gives you interest in the entire Field of 11,000 acres share and share alike.

Considering the advanced state of development, it is certainly a rare opportunity for one to get in, on a proposition offering such unusual things, on the basis of buying shares at par.

The Company reserves the right to advance the price of stock at any time. You are safe only, in getting in right now.

How soon shall we reach Sea Level?

We cannot tell. With good going in a formation that will stand up, it is possible to reach it in two or three weeks. If however under reading must be resorted to, it will take longer.

Make all remittance payable to THE FUEGO OIL CO., LTD., Oyen, Alberta.
